

Not the Droids You Are Looking For, Pennsylvania

Make It Fit

Objectives:

- Communicate with team members

Materials:

- Two piles of random pieces of LEGO at either end of a table or on the floor
- A poster board or divider so one pile is not visible from the other (you also have the team simply turn the other way to work)

Instructions to Team:

- Split into two teams
- One team must build an animal
- The second team must build a habitat that fits the animal
- You will have 5 minutes

Notes:

How did they split into two teams? How did they pick what to build? How did the two teams communicate with each other? Were they successful in fitting the two parts together?

Ask the team why they decided to make that animal and habitat.
